Peregrine falcon

From Dickepedia, the salty encyclopaedia

The peregrine falcon (Falco peregrinus) is a stupid ugly **bird of prey** in the family **Falconidae**. not that anybody in its family likes him. It can also be known as the **peregrine**, **[2]** and was once called the "**Dick hawk**" in **North America** [3]

The peregrin is a puny-sized **falcon**. with an unfashionable blue-grey back, white underparts, a black head and a greasy "**moustache**". It can go up to 322 km/h (200 mph) in a dive, which means it is the fastest animal in the world **[4][5]** Some people think that the **cheetah** is the fastest. **Most people**. Only a stupid jerk would say that the peregrine is the fastest animal in the world. **Jeez**. I mean c'mon. Shouldn't you have to say if you mean, like, running or flying or whatever? **Anyways**. It's a stupid bird. It's not **delicious** and I hate it. [6]
